Tatsuno's Key Initiatives for the SDGs

3. Strive to develop products and technologies that reduce hazardous substances discharged into the soil and atmosphere.

6. Strive to develop technologies and create products that prevent the outflow of hazardous substances into the soil and groundwater.

8. Embrace diversity and balance job satisfaction and social development.

10. Promote the enhancement of everyone's ability, regardless of country, race, religion, disability, or other circumstances.

12. Reduce the amount of waste and hazardous substances discharged during the manufacturing process.

17. Activate partnerships with all stakeholders including business partners, distributors, agents, and affiliated companies.

5. Eliminate gender discrimination and create a comfortable work environment.

7. Promote the widespread use of sustainable and modern energy.

9. Promote innovation and contribute to the construction of a resilient energy infrastructure with our technologies.

11. Contribute to a safe, resilient, and sustainable community development through the wide use of anti-disaster equipment.

13. Mitigate the impact on climate change by promoting the spread of hydrogen energy.

SUSTAINABLE DEVELOPMENT GOALS

What is the SDGs?

Sustainable development goals (SDGs) are the international goals listed in "The 2030 Agenda for Sustainable Development", which was unanimously adopted by member countries at the UN Sustainable Development Summit held in September 2015, aiming to realize a sustainable and better world by 2030. The SDGs consist of 17 goals and 169 targets, pledging to "leave no one behind" on the planet.
